(54) Method and system for providing native language query service

(57) The present invention provides a method for providing native language query service for Internet users by using a plurality of search engines, said method characterized by comprising steps of: (a) receiving at a site an original query request from one user; (b) selecting a suitable search engine; (c) translating said query words of native language into query

words of dedicated language of said selected search engine; (d) constructing a new query request directing to said search engine; (e) sending said new query request and receiving a returned query result; (f) sending said query result back to said user as a query result in relation to said original query request.
